We invite applications for:

One Doctoral (Ph.D.) Position (60%, 4 years), starting in January 2023 (can be delayed if necessary)

The successful applicant will work with Dr. Gidon Frischkorn on a project funded by the Swiss National Science Foundation entitled: “**The binding hypothesis – a unified account of cognitive individual differences?**”. The project aims to improve the measurement of declarative and procedural binding ability in working memory and investigate if this ability can provide a unified account of individual differences in cognitive abilities.

We offer:

- Work in a friendly, supportive, and international research team
- Opportunity for a Ph.D. dissertation and support for pursuing a career in research
- Excellent lab infrastructure
- Salary according to SNF regulations (approx. CHF 47,000-50,000 per year) for up to 4 years

We expect:

- A MSc or equivalent in Psychology or a related discipline (preferably from a Bologna compatible 2-year MSc program)
- Experience with experimental research and individual differences research
- Excellent knowledge and skills in research methods
- Interest in pursuing an academic career in cognitive psychology
- Very good command of English (written and oral)

Programming skills (e.g., R, Matlab, Python, JavaScript) and experience with Bayesian statistics, Structural Equation Modeling, or Multi-Level Modeling will be an advantage.

Application

Please send your application as a *single* PDF, including (1) a current CV, (2) a copy of academic transcripts, (3) a cover letter describing your research interests, previous experience, and motivation to apply for this position, and (4) the contact of, at least, one reference per email to:

gidon.frischkorn@psychologie.uzh.ch

Deadline: September 30, 2022.

Virtual interviews with short-listed applicants will be scheduled for October 12th/13th. Please expect to give a short (20 min) presentation on your latest graduation thesis.

Information/Questions
